Abraxus Snow and Ice Management Turns 50!!!

“My sincere thanks goes out to all of our clients over the years. We couldn’t have done it without you!”

Frank Dedon
President/Owner
Abraxus Snow and Ice Management

In 1970 I started Abraxus, providing remodeling services and snow removal. In January, 1978, a giant blizzard called “The Cleveland Superbomb” buried NE Ohio and the “The Financial Crash of 1978” hit, with the stock market losing over 90%. Those two storms, one winter, the other financial, convinced me to dedicate my business 100% to snow and ice management. Knowing snowy winters were a constant in Ohio, regardless of the economy, I felt it was a prudent decision.

For 50 years now, subs come to me. In some cases, I’ve worked with 3 generations of snowfighters (Father, Son, and Grandson). The snow business is stressful and unpredictable, but through a shared vision of hard work and dedication, we learned success comes from communication and loyalty, between ourselves and our clients. Beyond our +95% customer retention level, we’re also proud of the help we provide to first-responders, in effect responding first to their needs to access properties during intense winter storm events.

Looking back makes me very thankful to all those fathers, sons and grandsons that fought snow with us, and to our loyal and faithful clientele. From myself, and all the crew at Abraxus Snow and Ice Management, **Thank You. We really couldn’t have done it without you.**

A New Giant Fish Submarine Just Surfaced in Downtown Cleveland

A Never-Seen Before Half-Pound Whale of a Fish Fillet Sandwich!!!

When did nature start breeding rectangle-shaped fish anyway? Getting a fish sandwich from a fast-food joint often means a soggy, nasty piece of formed, pressed, processed fish that's been stagnating under a heat lamp.

What makes a great fish sandwich? A real one, right? Like from one fish. Alaskan white fish feed in clean waters and provide heart-healthy Omega-3 fatty acids, so let's go with that for the fillet. And how about making it in a size that satisfies, not a mini-sandwich that you have to buy two or more of, or the thin, flat pressed patty variety that fills you up on cheap, starchy buns.

So, a great fish sandwich is made from an Alaskan white fish fillet large enough to satisfy. It should have a light crispy batter and be served on a fresh baked submarine bun to hold that big fillet, resting on a bed of lettuce and specially prepared tartar sauce.

Why You Need to Try the GIANT Rascal House Fish Sub Sandwich:

-  Giant battered, flaky white fish fillet, not a nasty formed, minced fish patty.
-  Hunger-busting half-pound of delicious, white fish on fresh baked bread.
-  Great tasting high protein meal loaded with over 1,000 milligrams of heart-healthy Omega-3 fatty acids.
-  Available for a limited time only, so reel yours in before they head back out to sea!

Since we're a different kind of pizza place, we wanted to offer you a fish sandwich that is a great tasting meal, not just more of the same old fast-food fare. But hurry. The GIANT Rascal House Fish Sub is only available for a limited time, so cast your line for the greatest fish sandwich made just the way you like it: satisfying and for real!
